# AGROCHEMICALS

## AGRIFLUIDE

<http://www.agrifluide.com/>

Grupo Agrifluide comprises the following companies: Agrifluide, Nitrosol, Fertifluid y Ni-tronor. These companies are devoted to the production and commercialisation of liquid fertilisers and have been working on crop nutrition for over 40 years, becoming a pioneer in the liquid fertilisers industry. Grupo Agrifluide conducts its own research studies that allow us to have a better knowledge of the cultivation necessities and to supply solutions.

## MAFA VEGETAL ECOBIOLOGY

<https://www.mafa.es/>

MAFA is founded in 1969 with the aim of helping the farmers, saving the environment and making the crops more profitable and healthy. The main activity is the formulation of phytobiotics, biostimulants, fertilizers and soil and water correctors. The research activity is focused on finding the answer to the problems of crops, through research and development of innovative agricultural solutions.

## GRUPO PYMAR

[www.grupopymar.es](http://www.grupopymar.es)

Company dedicated to the development of packaging projects for all kinds of products. Automatic Packaging machines adapted to the needs of our customers, from small to large productions, to different packaging formats and products. Our experience offers us the possibility of advising our customers to give the best solution to their process.

## MSC FÁBRICAS AGRÍCOLAS

<https://grupomsc.com/>

MSC Greenhouses is a leading Company in the protected agriculture and agricultural engineering sector, with more than 30 years of experience. MSC Greenhouses has structures factories in Pamplona (Spain) and Guadalajara (Mexico), in addition to facilities and projects of different dimensions in more than 50 countries.

## HEFE FERTILIZER

[www.hefefertilizer.com](http://www.hefefertilizer.com)

At HEFE Fertilizer we manufacture since 2006 a wide range of conventional and 100% organic fertilizers, biostimulants and biopesticides for all types of crops and soils. Our mission is to provide farmers with modern and environmentally friendly solutions. When science meets agriculture, you get a fertilizer like ours: 100% effectiveness, 100% science. It looks like a dream, but it isn't. Contact us!

## NORDEN AGRO

<https://www.quimsaitw.com/agricultura/>

Norden Agro is a brand specialized in offering professional solutions to optimize savings and efficiency through personalized technical advice, top-quality products and environmental protection in the agriculture sector.

## HEROGRAS ESPECIALES (GRUPO HEROGRAS)

[www.herograespeciales.com](http://www.herograespeciales.com)

Manufacturing and marketing of high-tech specialty fertilizers for agriculture.

## NOVASYS

[www.novasy.es](http://www.novasy.es)

NOVASYS is a biotechnology company located in Almería (Spain) with over 20 years of experience in the sector and dedicated to the development, manufacture and commercialization of specific and specialty fertilizers, biostimulants and nutritional products to sanitize irrigation ponds. Our products have organic and zero waste certificates that advocate a sustainable and waste-free agriculture. Furthermore, our products help the growers improve the productivity and quality of any type of crop.

# AGROCHEMICALS

## NUTRICROP S.L.

[www.nutricrop.es](http://www.nutricrop.es)

The main activities of Nutricrop are focused in the development of plant nutrition and plant protection products, as well as, substrates and other specialities for horticultural crops. In 2021, Nutricrop starts with its new plant production in Almería which consist of substrates plant, fertilizers plant, offices and research area. It has a big portfolio based on liquid fertilizers, plant enhances, biostimulants, biofertilizers and substrates as cocopeat, peat moss, mixes, etc.

## SOT - SPANISH OLIVE TECHNOLOGY

[www.spanisholivetechnology.com](http://www.spanisholivetechnology.com)

Group of manufacturing companies of machines, equipments and services with all related to olive oil sector and also activity in nuts sector en greenhouses.

## NUTRIFER ECOL SL

[www.nutriferecol.es](http://www.nutriferecol.es)

Nutrifer Ecol is a young company located in the most important center of agricultural production in Europe, Almería. Despite its young age, it has a team of trained and experienced people in the design of new products to meet the needs of each client and crop. Its «focus» is specialized plant nutrition, presenting a number of formulations adapted to each of the most important phenological stages of the crops. For this they have an extensive catalog of high quality, high efficiency and friendly.

## VELLSAM MATERIAS BIOACTIVAS

[www.vellsam.com](http://www.vellsam.com)

We are one of the leading Spanish companies in the manufacture and marketing of all kinds of nutrients and biostimulants for agriculture with a large global presence. Our products cover the needs of the plant in all phases of the cultivation from rooting to harvest, increasing production and quality and a large part of them are certified for organic farming.

## OUR AGRO, S.L.

[www.ouragro.es](http://www.ouragro.es)

Plant nutrition.

## QUELAGROW IBERICA

[www.quelagrow.com](http://www.quelagrow.com)

We manufacture agrochemicals and agricultural fertilizers. We have a line of organic products. We are specialized in intensive agriculture (horticulture) and fruit growing. And we adapt our production to the client's requirements: formulations and formats (from very small 200 g (solids) 250cc (liquids) to large 25kg (solids) and 1,000L (liquids), all thanks to our automatic packaging systems.

# VEGETABLE NUTRITION AND BIOSTIMULANTS

## AGRIFLUIDE

<http://www.agrifluide.com/>

Grupo Agrifluide comprises the following companies: Agrifluide, Nitrosol, Fertifluid y Ni-tronor. These companies are devoted to the production and commercialisation of liquid fertilisers and have been working on crop nutrition for over 40 years, becoming a pioneer in the liquid fertilisers industry. Grupo Agrifluide conducts its own research studies that allow us to have a better knowledge of the cultivation necessities and to supply solutions.

## FERCRISARA

[www.crisara.com](http://www.crisara.com)

Organic fertiliser producers and marketers.

## AGROGENIA BIOTECH

[www.agrogenia.es](http://www.agrogenia.es)

Development, manufacture and commercialization of Biofertilizers.

## FERTINAGRO BIOTECH S.L

[www.fertinagrobiotech.com](http://www.fertinagrobiotech.com)

Fertinagro Biotech S.L. belongs to the Tervalis Group and it is a Spanish plant nutrition leader focus in research and innovation with an investment of three million euros for more than ten years, with more than 44 patents covering all range of fertilizers thanks to its large production facilities where we develop and produce all our solutions for farmers worldwide.

## BIORIZON BIOTECH

[www.biorizon.es](http://www.biorizon.es)

Our range of products is adapted to the needs of the farmer, offering from natural Bioenhancers based on our patented TrieTech technology, to Bioprotectors, products for organic farming and new solutions for the microbiological nutrition of the soils.

## HEFE FERTILIZER

[www.hefefertilizer.com](http://www.hefefertilizer.com)

At HEFE Fertilizer we manufacture since 2006 a wide range of conventional and 100% organic fertilizers, biostimulants and biopesticides for all types of crops and soils. Our mission is to provide farmers with modern and environmentally friendly solutions. When science meets agriculture, you get a fertilizer like ours: 100% effectiveness, 100% science. It looks like a dream, but it isn't. Contact us!

## FERCAMPO

[www.fercampo.com](http://www.fercampo.com)

Fercampo is a producer and distributor of plant nutrition solutions. We are part of the fertiberia group (European leader in the production of fertilizers) and, as such, we guarantee products of the highest quality and cutting-edge technology. We are present in 20 countries around the world.

## HEROGR ESPECIALES (GRUPO HEROGR)

[www.herograespeciales.com](http://www.herograespeciales.com)

Manufacturing and marketing of high-tech specialty fertilizers for agriculture.

# VEGETABLE NUTRITION AND BIOSTIMULANTS

## INAGRO

[www.inagroup.es](http://www.inagroup.es)

INAGRO has been manufacturing and marketing nutritional, biostimulants and bioprotectors products aiming for a more sustainable agriculture since 2000. The company researches to develop a wide range of products, both for conventional and organic agriculture, in order to meet the needs of all type of crops and client requests. Currently, more than 30 products are available at a nutritional and protection level against important damaging pests and diseases.

## NOVASYS

[www.novasys.es](http://www.novasys.es)

NOVASYS is a biotechnology company located in Almería (Spain) with over 20 years of experience in the sector and dedicated to the development, manufacture and commercialization of specific and specialty fertilizers, biostimulants and nutritional products to sanitize irrigation ponds. Our products have organic and zero waste certificates that advocate a sustainable and waste-free agriculture. Furthermore, our products help the growers improve the productivity and quality of any type of crop.

## INTERJOSPAL

[www.jospal.com](http://www.jospal.com)

INTERJOSPAL is Spanish company specialized in Plant Nutrition Since 2009, it has been playing a leading role on the national and the international markets. INTERJOSPAL has four research stations for tests and trials of our products in several vegetable crops, in our stations located in Almería (2 stations), Algeria and Jordan Valley also engaged in research on vegetable crops grown in organic soils, varieties, biological control, weed control, disease control and nutrient management.

## NUTRICROP S.L.

[www.nutricrop.es](http://www.nutricrop.es)

The main activities of Nutricrop are focused in the development of plant nutrition and plant protection products, as well as, substrates and other specialities for horticultural crops. In 2021, Nutricrop starts with its new plant production in Almería which consist of substrates plant, fertilizers plant, offices and research area. It has a big portfolio based on liquid fertilizers, plant enhancers, biostimulants, biofertilizers and substrates as cocopeat, peat moss, mixes, etc.

## MAFA VEGETAL ECOBIOLOGY

<https://www.mafa.es/>

MAFA is founded in 1969 with the aim of helping the farmers, saving the environment and making the corps more profitable and healthy. The main activity is the formulation of phytochemicals, biostimulants, fertilizers and soil and water correctors. The research activity is focused on finding the answer to the problems of crops, through research and development of innovative agricultural solutions.

## NUTRIFER ECOL SL

[www.nutriferecol.es](http://www.nutriferecol.es)

Nutrifer Ecol is a young company located in the most important center of agricultural production in Europe, Almería. Despite its young age, it has a team of trained and experienced people in the design of new products to meet the needs of each client and crop. Its «focus» is specialized plant nutrition, presenting a number of formulations adapted to each of the most important phenological stages of the crops. For this they have an extensive catalog of high quality, high efficiency and friendly.

## NORDEN AGRO

<https://www.quimsaitw.com/agricultura/>

Norden Agro is a brand specialized in offering professional solutions to optimize savings and efficiency through personalized technical advice, top-quality products and environmental protection in the agriculture sector.

## OUR AGRO, S.L.

[www.ouragro.es](http://www.ouragro.es)

Plant nutrition.

# VEGETABLE NUTRITION AND BIOSTIMULANTS

## QUELAGROW IBERICA

[www.quelagrow.com](http://www.quelagrow.com)

We manufacture agrochemicals and agricultural fertilizers. We have a line of organic products. We are specialized in intensive agriculture (horticulture) and fruit growing. And we adapt our production to the client's requirements: formulations and formats (from very small 200 g (solids) 250cc (liquids) to large 25kg (solids) and 1,000L (liquids), all thanks to our automatic packaging systems.

## SERAGRO INTEGRAL, S.L.

[www.fertilizantesliquidos.es](http://www.fertilizantesliquidos.es)

Design, production and commercialization of biostimulants and vegetable nutrients.

## VELLSAM MATERIAS BIOACTIVAS

[www.vellsam.com](http://www.vellsam.com)

We are one of the leading Spanish companies in the manufacture and marketing of all kinds of nutrients and biostimulants for agriculture with a large global presence. Our products cover the needs of the plant in all phases of the cultivation from rooting to harvest, increasing production and quality and a large part of them are certified for organic farming.

# GROWING SUBSTRATES

## GRUPO PYMAR

[www.grupopymar.es](http://www.grupopymar.es)

Company dedicated to the development of packaging projects for all kinds of products. Automatic Packaging machines adapted to the needs of our customers, from small to large productions, to different packaging formats and products. Our experience offers us the possibility of advising our customers to give the best solution to their process.

## SANJORGE

[www.sanjour.es](http://www.sanjour.es)

Técnicas Sanjorge S.L. is a company that has been operating in the agro-industrial sector for decades, manufacturing macro-tunnel type greenhouses, hydroponics, irrigation systems and agricultural supplies. We have always been by the farmer's side, listening to him and offering solutions in this evolution of needs for the improvement of his crops. Our range of tunnel systems enable the grower to increase the yields, improve quality, maximize cropping area, lengthen harvest periods and smooth prod.

## MSC FÁBRICAS AGRÍCOLAS

<https://grupomsc.com/>

MSC Greenhouses is a leading Company in the protected agriculture and agricultural engineering sector, with more than 30 years of experience. MSC Greenhouses has structures factories in Pamplona (Spain) and Guadalajara (Mexico), in addition to facilities and projects of different dimensions in more than 50 countries.

## NORDEN AGRO

<https://www.quimsaitw.com/agricultura/>

Norden Agro is a brand specialized in offering professional solutions to optimize savings and efficiency through personalized technical advice, top-quality products and environmental protection in the agriculture sector.

## NUTRICROP S.L.

[www.nutricrop.es](http://www.nutricrop.es)

The main activities of Nutricrop are focused in the development of plant nutrition and plant protection products, as well as, substrates and other specialities for horticultural crops. In 2021, Nutricrop starts with its new plant production in Almería which consist of substrates plant, fertilizers plant, offices and research area. It has a big portfolio based on liquid fertilizers, plant enhances, biostimulants, biofertilizers and substrates as cocopeat, peat moss, mixes, etc.

# SEEDS, SEEDBEDS AND NURSERIES

## AGRINATURE INDÁLICA

<https://www.agri-nature.com/>

We are a company from Almeria (Spain) center of intensive horticulture.our Company commercialize seeds and have a R+D +i programs of tomate and Melon.

## ALARCONTROL

[www.alarcontrol.com](http://www.alarcontrol.com)

Greenhouses-intensive agriculture projects. electrical installations. climate control and drip irrigation.

## EFECTO SOLUCIONES

[www.efectosoluciones.com](http://www.efectosoluciones.com)

Efecto Soluciones SL produces and markets seeds internationally. Is characterized by the introduction of new plant species in different countries, always with the intention of offering new crop alternatives. Siambasa® (Panicum Maximum) with which we achieve an excellent relationship between production and quality. Crescent Sunn (Crotalaria Juncea) is an annual herbaceous species which stands out for its rapid establishment. Al-Fac produced under strict quality, obtaining high seed quality and purity.

## GRUPO PYMAR

[www.grupopymar.es](http://www.grupopymar.es)

Company dedicated to the development of packaging projects for all kinds of products. Automatic Packaging machines adapted to the needs of our customers, from small to large productions, to different packaging formats and products. Our experience offers us the possibility of advising our customers to give the best solution to their process.

# PLASTICS AND MESHES

## COTEXA ALCAINA

<http://www.cotexaagro.com>

COTEXA ALCALAINA constitutes 1.982 as a textile company specialized in manufacturing and marketing of agricultural meshes (agrotexiles) and other industrial technical fabrics.

## CRIADO Y LOPEZ

[www.criadoylopez.com](http://www.criadoylopez.com)

We produce agrotexiles (nets for agriculture) for crop protection against insect and weather conditions.

## MSC FÁBRICAS AGRÍCOLAS

<https://grupomsc.com/>

MSC Greenhouses is a leading Company in the protected agriculture and agricultural engineering sector, with more than 30 years of experience. MSC Greenhouses has structures factories in Pamplona (Spain) and Guadalajara (Mexico), in addition to facilities and projects of different dimensions in more than 50 countries.

**Sanjorge**  
field making

## SANJORGE

[www.sanjour.es](http://www.sanjour.es)

Técnicas Sanjorge S.L. is a company that has been operating in the agro-industrial sector for decades, manufacturing macro-tunnel type greenhouses, hydroponics, irrigation systems and agricultural supplies. We have always been by the farmer's side, listening to him and offering solutions in this evolution of needs for the improvement of his crops. Our range of tunnel systems enable the grower to increase the yields, improve quality, maximize cropping area, lengthen harvest periods and smooth prod.

## SOTRAFA

[www.sotrafa.com](http://www.sotrafa.com)

SOTRAFA, is a manufacturer belonging to the Armando Álvarez Group, a leader in polyethylene film and sheet processing in Spain and one of the first in Europe, with an annual production of over 300.000 tones. Our company is based in Almería Spain, in an area which has the biggest concentration of greenhouses in the world. We actually export to 43 countries and we have experience in this sector for over 30 years. Our activity is designed to two different sections: agricultural market development.

# AGRICULTURAL MACHINERY

## BERRYPRO

<https://berrypro.eu/>

Earis & Berrypro is a company dedicated to the design and manufacture of industrial machinery focused on the berry sector, offering companies special solutions for the handling, packaging and labelling of blueberries.

## MSC FÁBRICAS AGRÍCOLAS

<https://grupomsc.com/>

MSC Greenhouses is a leading Company in the protected agriculture and agricultural engineering sector, with more than 30 years of experience. MSC Greenhouses has structures factories in Pamplona (Spain) and Guadalajara (Mexico), in addition to facilities and projects of different dimensions in more than 50 countries.

## CARRETILLAS AMATE

[www.carretillasamate.com](http://www.carretillasamate.com)

Amate trolleys help us to explore, produce and sell agricultural equipment for greenhouse crops, greenhouses, nets, shade nets, and also its offer the best practical solutions with portable products to optimize daily work in intensive agriculture. Direct communication with farmers, listening to them, and studying their needs on the agricultural fields - allow us better develop our product. The working team is completely immersed in all production and evolutionary processes, offering the very best.

## SANJORGE

[www.sanjour.es](http://www.sanjour.es)

Técnicas Sanjorge S.L. is a company that has been operating in the agro-industrial sector for decades, manufacturing macro-tunnel type greenhouses, hydroponics, irrigation systems and agricultural supplies. We have always been by the farmer's side, listening to him and offering solutions in this evolution of needs for the improvement of his crops. Our range of tunnel systems enable the grower to increase the yields, improve quality, maximize cropping area, lengthen harvest periods and smooth prod.

## IDM

[www.idm-agrometal.com](http://www.idm-agrometal.com)

Machinery for high density agriculture: sprayers, trolleys.

## SOT - SPANISH OLIVE TECHNOLOGY

[www.spanisholivetechology.com](http://www.spanisholivetechology.com)

Group of manufacturing companies of machines, equipments and services with all related to olive oil sector and also activity in nuts sector en greenhouses.

## ITT CM93

[www.CM93.com](http://www.CM93.com)

We are one of the largest distributors of agricultural and construction machinery in Spain. True to the values we share with our producers, we continue to be backed by the best brands in the sector: NEW HOLLAND, CASE CONSTRUCTION, MANITOU, BOBCAT, AUSA, ATLAS COPCO, PUTZMEISTER, BOMAG, HORSCH, CORVUS and HAMM, as well as the top manufacturers of tools and implements. Our companies have great export know-how in many countries worldwide. We take care of everything, including transport, customs...

# HANDLING MACHINERY

## BASCULAS SOPP

[www.soppslu.com](http://www.soppslu.com)

Pesaj Process Solutions (SOPP Scales) is a company located in Linares Jaén dedicated to Design, Manufacturing, Assembly, Distribution and Post-Sales for Industrial Sectors, its specialty being the weighing of SOLID and LIQUID bulk with variable densities.

## BERRYPRO

<https://berrypro.eu/>

Earis & Berrypro is a company dedicated to the design and manufacture of industrial machinery focused on the berry sector, offering companies special solutions for the handling, packaging and labelling of blueberries.

## MSC FÁBRICAS AGRÍCOLAS

<https://grupomsc.com/>

MSC Greenhouses is a leading Company in the protected agriculture and agricultural engineering sector, with more than 30 years of experience. MSC Greenhouses has structures factories in Pamplona (Spain) and Guadalajara (Mexico), in addition to facilities and projects of different dimensions in more than 50 countries.

## RITEC HIDRO

<https://ritec.es/>

RITEC (Riegos y Tecnología S.L.) is a company created in 1994, which specialises in the design, manufacture and installation of all types of fertigation, climate control and humidification equipment, as well as the implementation of turnkey irrigation projects, both for greenhouse and outdoor crops. RITEC has developed projects in more than 55 countries.

## AGQ LABS

<http://www.agq.com.es/>

Analitical Sevices and Agricultural Consultancy.

## BRIOAGRO TECH

<https://brioagro.es/>

BrioAgro is a smart irrigation company, using innovative technology that allows crops to be irrigated just when they need it. In this way, it achieves water savings of between 20% and 50%, depending on the type of crop and soil. This responsible irrigation also allows for a reduction in energy costs for pumping irrigation, fertilisers and phytosanitary products. Recently awarded by the UE, EIT Food initiative as the startup that can best help solve the challenge of water scarcity in Southern UE.

## GRUPO HISPATEC

[www.hispatec.com](http://www.hispatec.com)

Technology for the food and agriculture sector, management software, mobile applications, big data and machine learning.

## RIDDER ESPAÑA

[www.ridder.com](http://www.ridder.com)

Ridder: Solutions for the ideal growing environment. Wide product range of drive systems Ridder for ventilations and screens, to achieve a perfect greenhouse climate with complete peace of mind. Ridder climate screens for the exact amount of light at the right time and sophisticated strategies for temperature, humidity and energy saving. Climate- and irrigation control computers Ridder: From simple systems for small businesses to large and complex systems for high-tech greenhouses.

<https://wise-rrisystem.com>

Wise offers solutions (methodologies & Equipment) to perform and efficient fertirrigation process. It includes the quantification of the retention water capacity of soil, measurement and communication devices and a training process of 30 days.

# IRRIGATION AND CLIMATE CONTROL

## ALARCONTROL

[www.alarcontrol.com](http://www.alarcontrol.com)

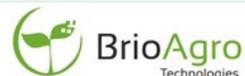

Greenhouses-intensive agriculture projects. electrical installations. climate control and drip irrigation.

## NORDEN AGRO

<https://www.quimsaitw.com/agricultura/>

Norden Agro is a brand specialized in offering professional solutions to optimize savings and efficiency through personalized technical advice, top-quality products and environmental protection in the agriculture sector.

## BRIOAGRO TECH

<https://brioagro.es/>

BrioAgro is a smart irrigation company, using innovative technology that allows crops to be irrigated just when they need it. In this way, it achieves water savings of between 20% and 50%, depending on the type of crop and soil. ## NOVAGRIC

[www.novagric.com](http://www.novagric.com)

International leaders in technologic services for high value intensive crops that provide integral services (Turn-Key Projects). Since 1978 we are designing, manufacturing and installing all technology needed for high level agriculture world while. Our expertise areas are: - GREENHOUSES adapted to particular requirement and electronic systems to fully automate control (irrigation, climate control, screens.etc). - IRRIGATION PROJECTS - Design and installation of WATER TREATMENT EQUIPMENT.

## MSC FÁBRICAS AGRÍCOLAS

<https://grupomsc.com/>

MSC Greenhouses is a leading Company in the protected agriculture and agricultural engineering sector, with more than 30 years of experience. MSC Greenhouses has structures factories in Pamplona (Spain) and Guadalajara (Mexico), in addition to facilities and projects of different dimensions in more than 50 countries.

## RIDDER ESPAÑA

[www.ridder.com](http://www.ridder.com)

Ridder: Solutions for the ideal growing environment. Wide product range of drive systems Ridder for ventilations and screens, to achieve a perfect greenhouse climate with complete peace of mind. Ridder climate screens for the exact amount of light at the right time and sophisticated strategies for temperature, humidity and energy saving. Climate- and irrigation control computers Ridder: From simple systems for small businesses to large and complex systems for high-tech greenhouses.

## NGS - NEW GROWING SYSTEM

[www.ngssystem.com](http://www.ngssystem.com)

Development and manufacturing of advanced solutions for high performance agriculture.

## RITEC HIDRO

<https://ritec.es/>

RITEC (Riegos y Tecnología S.L.) is a company created in 1994, which specialises in the design, manufacture and installation of all types of fertigation, climate control and humidification equipment, as well as the implementation of turnkey irrigation projects, both for greenhouse and outdoor crops. RITEC has developed projects in more than 55 countries.

# IRRIGATION AND CLIMATE CONTROL

Sanjorge  
field making

## SANJORGE

[www.sanjour.es](http://www.sanjour.es)

Técnicas Sanjorge S.L. is a company that has been operating in the agro-industrial sector for decades, manufacturing macro-tunnel type greenhouses, hydroponics, irrigation systems and agricultural supplies. We have always been by the farmer's side, listening to him and offering solutions in this evolution of needs for the improvement of his crops. Our range of tunnel systems enable the grower to increase the yields, improve quality, maximize cropping area, lengthen harvest periods and smooth prod.

SOT  
all you need  
to produce olive oil

## SOT - SPANISH OLIVE TECHNOLOGY

[www.spanisholivetechology.com](http://www.spanisholivetechology.com)

Group of manufacturing companies of machines, equipments and services with all related to olive oil sector and also activity in nuts sector in greenhouses.

wise  
AGROTECNOLOGÍA

## WISE AGROTECNOLOGÍA

<https://wise-rrisystem.com>

Wise offers solutions (methodologies & Equipment) to perform an efficient fertirrigation process. It includes the quantification of the retention water capacity of soil, measurement and communication devices and a training process of 30 days.

# DISTRIBUTION

## EFECTO SOLUCIONES

[www.efectosoluciones.com](http://www.efectosoluciones.com)

Efecto Soluciones SL produces and markets seeds internationally. Is characterized by the introduction of new plant species in different countries, always with the intention of offering new crop alternatives. Siambasa® (Panicum Maximum) with which we achieve an excellent relationship between production and quality. Crescent Sunn (Crotalaria Juncea) is an annual herbaceous species which stands out for its rapid establishment. Al-Fac produced under strict quality, obtaining high seed quality and purity

## MOLDEADOS PLÁSTICOS ALBER

[www.alber.es](http://www.alber.es)

We are manufacturers of pots and different articles of agricultural production with plastic by injected plastic.

## NOVASYS

[www.novasys.es](http://www.novasys.es)

NOVASYS is a biotechnology company located in Almería (Spain) with over 20 years of experience in the sector and dedicated to the development, manufacture and commercialization of specific and specialty fertilizers, biostimulants and nutritional products to sanitize irrigation ponds. Our products have organic and zero waste certificates that advocate a sustainable and waste-free agriculture. Furthermore, our products help the growers improve the productivity and quality of any type of crop.

## TREFILADOS URBANO

[www.trefiladosurbano.com](http://www.trefiladosurbano.com)

Manufacture of wire for agricultural and industrial use.

# SERVICIOS AVANZADOS

## BRIOAGRO TECH

<https://brioagro.es/>

BrioAgro is a smart irrigation company, using innovative technology that allows crops to be irrigated just when they need it. In this way, it achieves water savings of between 20% and 50%, depending on the type of crop and soil. This responsible irrigation also allows for a reduction in energy costs for pumping irrigation, fertilisers and phytosanitary products. Recently awarded by the UE, EIT Food initiative as the startup that can best help solve the challenge of water scarcity in Southern UE.

## CENTRO TECNOLÓGICO TECNOVA

[www.fundaciontecnova.com](http://www.fundaciontecnova.com)

Tecnova is the Technological Center of reference at an international level that encompasses all the technology necessary to add value, from the production of fruits and vegetables to post-harvest technology and food processing. Services: Agroindustrial Pilot Project. Agricultural and Technology Farm Advisory. Training in crops management and greenhouse technology.

## GRUPO HISPATEC

[www.hispattec.com](http://www.hispattec.com)

Technology for the food and agriculture sector, management software, mobile applications, big data and machine learning.

## SOT - SPANISH OLIVE TECHNOLOGY

[www.spanisholivetechnology.com](http://www.spanisholivetechnology.com)

Group of manufacturing companies of machines, equipments and services with all related to olive oil sector and also activity in nuts sector en greenhouses.

# OTHERS

## AGRINATURE INDÁLICA

<https://www.agri-nature.com/>

We are a company from Almeria (Spain) center of intensive horticulture.our Company commercialize seeds and have a R+D +i programs of tomate and Melon.

## CENTRO TECNOLÓGICO TECNOVA
